VAISALA

DPT145 Multiparameter Transmitter

For SF6 gas

Features

- The first transmitter to offer online measurement of seven SF₆ parameters in one unit
- Measured parameters: dew point, pressure, temperature
- Calculated parameters: SF₆
 density, normalized pressure, dew
 point in atmospheric pressure,
 ppm
- More reliable assessment of the condition of SF₆ insulation due to online measurement
- Digital output: RS-485 with Modbus®
- · Long calibration interval of years

Vaisala Multiparameter Transmitter DPT145 with DILO DN20 connector

Vaisala Multiparameter Transmitter DPT145 for SF_6 gas is a unique innovation that enables online measurement of dew point, pressure, and temperature. It also calculates four other values, including SF_6 density. DPT145 is especially well suited for integration into OEM systems.

Online reliability

Online dew point measurement combined with pressure measurement provides an excellent assessment of the condition of SF_6 insulation. Sudden and minor leakages are immediately detected by the direct normalized pressure measurement, while online dew point measurement alerts the user to moisture issues, which can weaken the insulation properties of SF_6 and cause rapid deterioration. With DPT145, it is also easy to build a redundant solution for multiple parameters.

Savings across the board

A single transmitter, instead of several, saves time and money across the board, from investment to installation, operation, and servicing. Lower assembly

costs, fewer cables and connectors, minimized need for on-site visits and field operations - all these translate into cumulative savings. The long calibration interval results in further savings.

Risk-free, greener solution

Online measurement enables gas trends to be followed via a data collection system, making monitoring fast, risk-free, and accurate. Using one instrument for monitoring seven different parameters means also fewer mechanical connections and reduces the risk of leaks. Monitoring is environmentally friendly because there is no need for sampling - no ${\sf SF}_6$ gas is released into the atmosphere.

The fruit of experience

Vaisala has over 80 years of extensive measurement experience and knowledge. DPT145 brings together the proven DRYCAP® dew point sensor technology and BAROCAP® pressure sensor technology in one package, providing an innovative and convenient solution for monitoring SF₆ gas.
