

## Lightning Surge Protectors for Electronics Equipment M-RESTER

### LIGHTNING SURGE PROTECTOR FOR POTENTIOMETER USE

(ultra-slim)

#### Functions & Features

- High discharge current capacity 20 kA (8 / 20  $\mu$ s), 1 kA (10 / 350  $\mu$ s)
- Ultra-thin 7-mm-wide module can be mounted in high density
- Excellent protection employing multi-stage SPD circuits
- DIN rail mounting and grounding
- Shield terminal provided
- CE marking

#### GENERAL SPECIFICATIONS

- Construction:** Slim-sized front terminal structure
- Degree of protection:** IP20
- Connection:** Euro terminal block (torque 0.3 N·m)
- Applicable wire size:** 0.2 - 2.5 mm<sup>2</sup>
- Grounding:** DIN Rail
- Housing material:** Flame-resistant resin (black)

#### INSTALLATION

- Operating temperature:** -25 to +85°C (-13 to +185°F)  
(See Safety Parameters for use in a hazardous location.)
- Operating humidity:** 30 to 90 %RH (non-condensing)
- Mounting:** DIN Rail (TH35-7.5, 1-mm-thick)  
Oxide film on the surface of an aluminium rail may lower the electric conductivity between this module and the ground. Use a steel or copper rail.
- Weight:** 70 g (2.5 oz)

## MODEL: MD7PM-[1][2]

#### ORDERING INFORMATION

- Code number: MD7PM-[1][2]  
Specify a code from below for each [1] and [2].  
(e.g. MD7PM-FF0)
- For the safety approval code 2, specify the product's destination country using Ordering Information Sheet (No. ESU-8057).

#### [1] SHIELD TERMINAL (line / earth)

- FF: Floating / Floating
- FG: Floating / Grounding
- GF: Grounding / Floating
- GG: Grounding / Grounding

#### [2] SAFETY APPROVAL

- 0: None
- 2: CENELEC intrinsic safety (ATEX)

## PERFORMANCE

MODEL NO.		MD7PM-FF	MD7PM-FG	MD7PM-GF	MD7PM-GG
Max. continuous operating voltage (Uc)	Line to Line	7.5V			
	Line to Earth	±160V			±7.5V
	Line to SHLD	±160V		±7.5V	
	SHLD to Earth	±160V	short	±160V	short
Voltage protection level (Up) @4kV (1.2 / 50 μs)	Line to Line	25V			
	Line to Earth	±800V			±25V
	Line to SHLD	±1200V	±800V	±25V	
	SHLD to Earth	±800V	short	±800V	short
Leakage current @Uc	Line to Line	≤5μA			
	Other sections	≤5μA			
Response time	Line to Line	≤4 nsec.			
	Other sections	≤20 nsec.			
Max. discharge current (Imax)	20kA (8 / 20 μs), 1.0kA (10 / 350 μs)				
Nominal current (In)	100mA				
Internal series resistance	4.7Ω ±10% per line				

## STANDARDS & APPROVALS

### CE conformity:

ATEX Directive (94/9/EC)  
 Ex ia EN 60079-11: 2007  
 Category 1G EN 60079-26: 2007  
 EMC Directive (2004/108/EC)  
 EMI EN 61000-6-4: 2007  
 EMS EN 61000-6-2: 2005

### Safety approval:

GENELEC: Intrinsic safety (ATEX)  
 Ⓢ II 1G, Ex ia IIC; T4 and T5  
 EN 60079-0: 2006  
 EN 60079-11: 2007  
 EN 60079-26: 2007

### Surge protection: IEC 61643-21: 2000

(Categories C1, C2, D1)

## SAFETY PARAMETERS

### ■ CENELEC / ATEX IS DATA

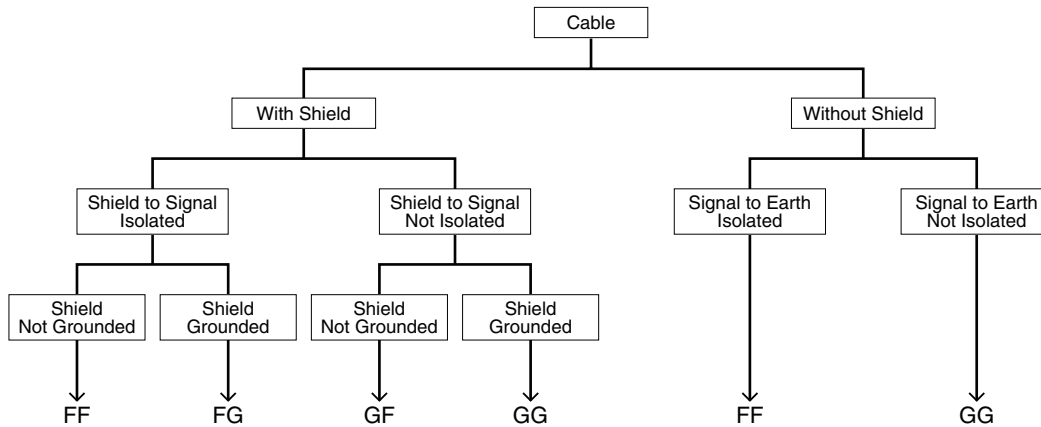

Ui (Vmax)	16V		
Ii (Imax)	any		
Ci	35 nF		
Li	0 μH		
Pi	Temp. Class	Range	Parameter
	T4	-25 to +40°C	1.3W
		-25 to +60°C	1.2W
		-25 to +80°C	1.0W
T5	-25 to +40°C	1.0W	

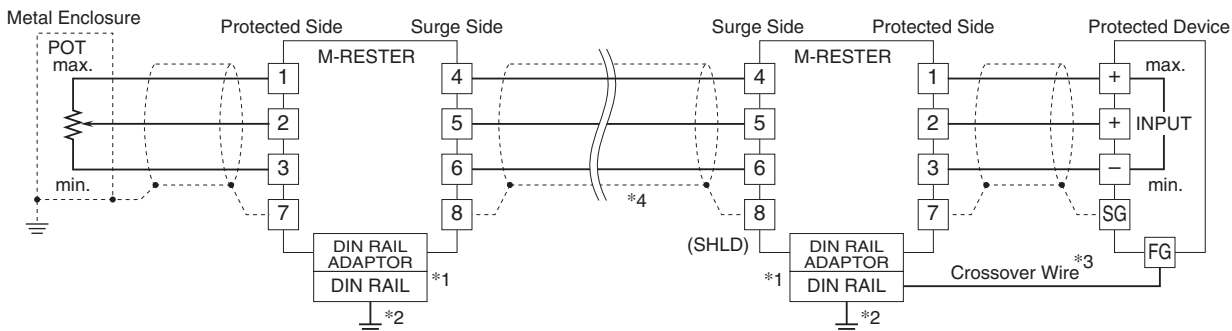

## DESCRIPTIONS

### ■ SELECTING SHIELD TERMINAL TYPE

- The surge protector has a dedicated shield terminal effective for easy shield wiring and surge protection.
- Review the shield method (grounding, non-grounding, connecting to SG, etc.) required by the protected device or system.
- There is no electrical effect to the shield by installing the surge protector, but an appropriate shield terminal type must be selected to suit user applications.
- Refer to the flow chart below to choose.

## CONNECTION EXAMPLES

- \*1. Oxide film on the surface of an aluminium rail may lower the electric conductivity between this module and the ground. Use a steel or copper rail.
- \*2. Be sure to ground the DIN rail. Recommended grounding resistance  $\leq 100\Omega$
- \*3. Cross-wire between the DIN rail and the metal housing of the protected device to equalize the earth potential. Ground only the surge protector when the protected device has no ground terminal.
- \*4. Shield wiring method is an example. Proceed according to the system requirements.

**EXTERNAL DIMENSIONS & TERMINAL ASSIGNMENTS unit: mm (inch)**
