CONNECTION EXAMPLES

■ PROTECTING TWO-WIRE SIGNAL LINES

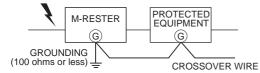

■ PROTECTING ELECTRONIC INSTRUMENTS' I/O

*1. Install a circuit protector when the transmitter output current exceeds 100mA. *2. The M-RESTER is designed in particular to protect signal lines. To protect power supply lines, install other types of surge protectors.

GROUNDING

A crossover wire between M-RESTER ground and the ground or metallic housing of the equipment is required for protection. If the protected equipment has no ground terminal, ground the M-RESTER only.

When the M-RESTER is mounted with DIN Rail Mounting Adapter, connect the grounding wire to the mounting screw of the M-RESTER.
